Subject: Referral for Network Engineer Position at Hollstadt Consulting

From: Juan Esteban Muñoz – Juanes20010531@gmail.com

To: Hollstadt Consulting - careers@hollstadt.com

Date: 10/06/2025

Email Body:

To Whom It May Concern,

I am writing to you in response to your the job opening for a Telecom/Network Engineer at Hollstadt Consulting.

With regards to my experience, I have analyzed, designed, coded, tested, implemented, and evaluated computer-based information systems since twenty twenty. I have written or contributed to instructions or manuals to guide end users for three years. I have worked with network infrastructure since January twenty twenty-one. I have configured and maintained secure VPN connections since March twenty twenty-three. I have worked on configuring firewalls and access control lists for one year starting August twenty twenty-two. I have scheduled network upgrades for two years. I have worked on configuring routing and switching equipment for five years. I have been proficient in basic network monitoring tools since twenty nineteen. I have been familiar with WAN/LAN and cloud networking since the end of twenty twenty. I have worked on cloud-based network environments for over a year and a half. I have provided support in firewall configuration and DNS security for more than a year. I enabled data to pass between computers for six months. I handled customer documentation and manuals for three years since March twenty twenty-one. I used Ansible and Python scripts for two years beginning July twenty twenty-one and I have secured network systems since twenty twenty.

In relation to my technical capabilities, I can configure and maintain VPN and firewall environments effectively. I can provide remote support and assist users in resolving technical issues efficiently. I can administer network security tools and ensure data protection in compliance with organizational standards. I can troubleshoot network outages and performance problems under pressure. I can design and implement structured cabling for efficient wired connections and I can collaborate on network optimization projects using tools such as Ansible and Python.

I look forward to your promptly reply.

Yours sincerely,

Juan Esteban Muñoz Villamil
